

ELinOS 7

Industrial Grade Linux

E LInOS is a SYSGO Linux distribution to help developers save time and effort by focusing on their application. Our Industrial Grade Linux with user-friendly IDE goes along with the best selection of software packages to meet our customers needs, and with the comfort of world-class technical support. ELinOS now includes Docker support in order to isolate applications running on the same system.

ELINOS FEATURES

- Industrial Grade
- Eclipse-based IDE for embedded Systems (CODEO)
- Multiple Linux kernel versions incl. Kernel 4.19 LTS with real-time enhancements
- Quick and easy target system configuration
- Hardware Emulation (QEMU)
- Extensive file system support
- Application debugging
- Target analysis
- Runs out-of-the-box on PikeOS
- Validated and tested for PowerPC, x86, ARM
- Support for 32- and 64-bit processors
- BSPs for major embedded boards and chip vendors included
- Cost-effective licensing model
- One-year support included

System Requirements

- 64-bit Linux host distributions
- Tested on Debian, Fedora, Ubuntu, OpenSUSE, Windows 10 (64-bit)
- 4 GB free disk space
- 2 GB RAM
- Java runtime environment 11

MANAGING EMBEDDED LINUX VERSATILITY

Creating an Embedded Linux based system is like solving a puzzle and putting the right pieces together. This requires a deep knowledge of Linux's versatility and takes time for the selection of components, development of Board Support Packages and drivers, and testing of the whole system – not only for newcomers.

With ELinOS, SYSGO offers an 'out-of-the-box' experience which allows to focus on the development of competitive applications itself. ELinOS incorporates the appropriate tools, such as a feature configurator to help you build the system and boost your project success, including a graphical configuration front-end with a built-in integrity validation.

APPLICATION & CONFIGURATION ENVIRONMENT

In addition to standard tools, remote debugging, target system monitoring and timing behaviour analyses are essential for application development.

CODEO is a complete Eclipse-based development environment. By means of the feature configurator, the developer is enabled to define the system configuration on a high level. The generation of the root file system and the Linux kernel configuration follow changes of the feature configuration automatically, by just considering components that are actually required. This mechanism lessens memory footprint and results in a significantly reduced number of possible attack vectors compared to a standard Linux system.

VERSATILE EMBEDDED LINUX

Kernel

ELinOS 7 includes Kernel 4.19 with optimizations for embedded usage. Other kernel versions are available for selected BSPs. The Linux kernel is automatically tailored based on the project's configuration and compiled within the CODEO IDE. The development toolchain is based on gcc-8.3, glibc 2.28 is provided as C library. Vendor kernels from a Yocto BSP can be easily imported into an ELinOS system.

Supported Hardware

Support for many CPU architectures, single- and multi-core platforms. ELinOS is tested and validated for:

- ARM 32- and 64-bit
- Power PC
- PowerPC 64
- x86 32- and 64-bit

Supported Boards

Qualified BSPs are available for various boards of our HW partners, major embedded board and chip vendors.

- AMD
- Intel
- Raspberry Pie
- NXP
- Phytex
- Renesas
- TQ Systems
- Texas Instruments
- Xilinx
- Others

Project Templates and customizable Feature Sets

Pre-configured templates and building blocks for typical embedded Linux usage domains are supplied to support a fast and easy project start.

- Network Device
- Web server
- QT embedded
- GTK
- X11
- Wayland / Weston
- Minimal footprint Linux
- Others

Simulation Targets

The CODEO IDE includes QEMU-based target HW emulators, allowing to run the project on a desktop computer.

Supported File Systems

Typical Linux, Windows and embedded file systems can be chosen and easily exchanged.

- Ext4/3/2
- UBIFS
- btrfs
- JFFS2
- SquashFS
- FAT
- NTFS
- RAM file systems
- NFS v4.1
- F2FS
- Others

TRAININGS, CONSULTING AND SUPPORT

We provide an outstanding peer-to-peer support and a broad range of professional services. This includes trainings and projec-specific consulting, live problem solving with the customer, a one-year E-Mail-based support for all SYSGO tools and life cycle updates to benefit from ongoing improvements.

Security Features

Secure the target system against external or internal threats using provided Security mechanisms and tools.

- Integrated rule-based firewall
- Secure remote shell access
- VPN

Industrial Automation

ELinOS Industrial Grade Linux explicitly supports the needs of Industrial Automation customers.

- CAN
- VME
- IPv6
- USB3.0
- WLAN
- Others (EtherCAT, ... upon request)

Pre-Compiled Target Binaries

To accelerate the embedded Linux configuration and building process, ELinOS industrial grade Linux includes more than 250 pre-compiled applications and libraries:

- BusyBox
- QT 5.11
- GTK+3.24
- XOrg-Server-1.19
- OpenSSH
- OpenVPN
- Lighttpd
- Apache 2.4
- Network manager 1.14.6
- Wayland 1.16
- MariaDB 10.3
- Perl 5.28
- And many more

APPLICATION DEVELOPMENT

Developing embedded applications needs special support from the development environment. Direct target connection for remote debugging, timing analysis and to gather runtime information is provided by the Eclipse-based CODEO (included in ELinOS).

Application Debugging

CODEO includes a debugger-based on Eclipse utilizing GDB. Register contents, variable values and break points can be displayed and edited.

Target Analysis

CODEO also includes a target analysing system based on Eclipse. The CODEO trace tool offers extended tracing capabilities, including SMP and 64-bit support.
